

Efficiently perform and track employee-assigned tasks with the EverServ® SureCheck WM solution.

EverServ SureCheck WM (Workforce Management) helps hospitality and retail operators efficiently complete and monitor the compliance of employee-assigned tasks. Managers can conduct store walks and audits with SureCheck WM instead of using inefficient and error-prone pen and paper systems. Loss prevention, safety, merchandising, and other audits can be completed using checklists on SureCheck WM as supervisors or employees walk through a store. Information is transmitted immediately to corporate for further analysis and action. When problems are identified, best-practice corrective action can be assigned to employees from within the system.

For operational efficiency and task compliance—select PAR EverServ SureCheck WM.

Benefits:

Automated Workforce Management – By automating management of employee-assigned task, SureCheck WM helps you ensure critical points are maintained. With real-time data delivery, it enables exception-based reporting and alerts while capturing timestamps and operator names for audit trails.

Consistent and Complete Record Keeping – Provides a platform for repeatable and measurable information logging of tasks. SureCheck WM maintains excellent records of compliance including execution timing, missing checklists, not observed, top violations, violation details, single checklist detail and a daily summary.

Increased Record Accuracy – Automated data collection (RFID tags) and archiving provides defensible monitoring data.

Integrated with ERP and Data Warehouse Systems – Key tasks and performance metrics are seamlessly integrated with centralized corporate systems, which eliminates manual inputs and inaccurate data. This makes it easy to tie performance metrics to managers' compensation plans.

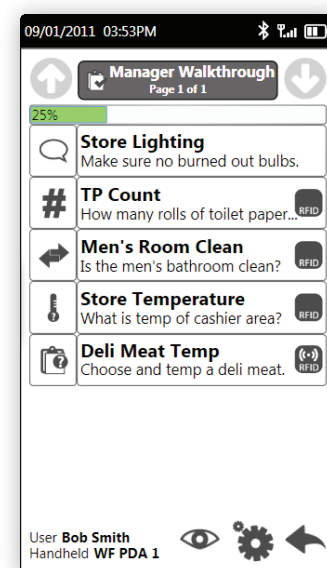

Minimal Training – Easy to use checklist workflow, reporting and administration requires very little training.

Quick Deployment and Easy Application Management – SureCheck WM's software-as-a service (SaaS) model enables you deploy the system quicker than if you had to install the software in your environment. With the SaaS model, you have everything you need (hardware, software and ongoing updates) so you don't have to worry about the technology and can focus on your business.

Minimal Up-front Costs – The SaaS model requires minimal capital expenditures compared to a client/server model.

Mobile Device Options: Janam or WebDT

PAR EverServ® SureCheck WM Features:

Task Checklist Monitoring – Ensures critical control points are maintained:

- Inspection reminders (flashing and/or audible)
- Checklists:
 - One-time or repeat scheduling
 - Transmission
