

PAR is proud to offer an extensive ecosystem of integration partners to complement our PixelPoint Software Solution.

As customer needs change, restaurant operators are continuing to enhance and expand their customer interaction capabilities to adapt to the evolving dining environment. By working closely with these partners, PAR can provide innovative solutions to customers' business needs while improving customer support and reducing the total cost of ownership of your solution. With **over 200 integrations worldwide**, PixelPoint offers all the flexibility and versatility you need to stay competitive.

PixelPoint is an open solution with a rapidly expanding list of interfaces and peripherals to enable system integrators to build their own extensions with PixelPoint POS at the core. Whether you're looking for enhanced payment capabilities, mobile/online ordering, loyalty, above store reporting, kitchen video system, gift cards or more.
