

Description

XPR offers Plug & Play, Cloud based and AI backed Self Ordering Solutions that include Self Ordering Kiosks, Virtual Kiosks for Contactless Ordering, Food Ordering Chatbot and Mobile Apps. XPR's solutions work on all major platforms including Windows, iOS, and Android and seamlessly work with the restaurant's existing POS systems.

Offerings

Our Solutions help restaurants grow their revenue while reducing costs at the same time

- Self Ordering Kiosks
- QR Code based Contactless Ordering
- Food Ordering Chatbot
- Mobile Apps: iOS and Android

Capabilities

The XPR - PAR/Brink Integration will help clients add Self Service technology to their already amazing POS system. Some of the key features of this integration are -

- Automatically fetch menu and prices from the POS
- Orders placed through XPR's Self Service Solutions are immediately sent to the POS
- Easy Plug & Play installation without any changes in existing backend systems

Features

- Wide Variety of Kiosk Hardware
- Completely Customizable Workflow
- Centralized Management & Reporting
- Time Based Menus
- Multi-lingual Support
- Intelligent Upsell & Cross Sell
